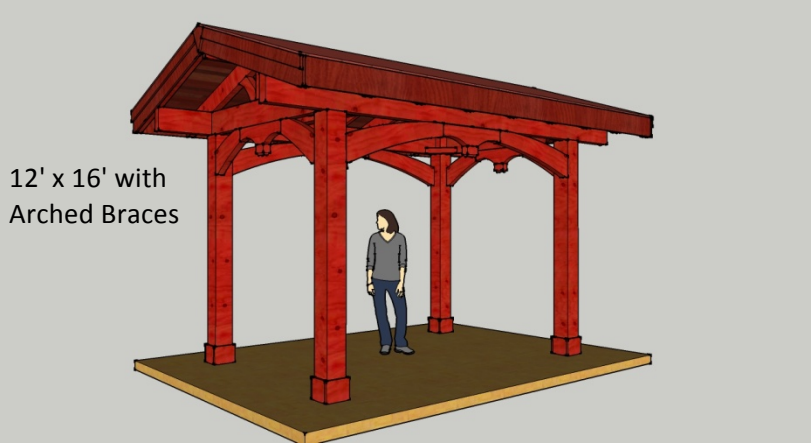
12' x 16' (B) Pavilion Specs and Pricing (Arched Braces)

Years of building outdoor kitchens, living rooms, patios, ponds, waterfalls, decorative seat walls, built in grills, fire surrounds and many other outdoor living amenities have taught us what works, what is practical and what people utilize. And most important, what is cost effective. The one thing that was limiting for people to take full advantage of their outdoor living spaces was a way to shelter the area without taking away the openness of the outdoors or disrupting the harmony with nature. The solution; A beautifully designed Wisconsin Pavilion with the option of convertible screens and a huge list of customizable amenities to fit individual lifestyles.



Specs:

- All full dimensional lumber in Rough Sawn White Pine
- Aerial footprint = 12'x16' with overhang (24" overhang)
- Net size post to post = 8' x 12' (4 massive posts 8x8 solid)
- Full 2x10x16' ridge beam
- Full 4x10x16' main beams, Full 4x10 gable end collar, 4x6 King Post and curved V-Braces
- Full 2x8 rafters with 2- 6x6 collar ties
- Full 2x12 arch cut post braces
- Tongue and Groove R.S. Western Red Cedar ceiling prefinished both sides
- Western Red cedar fascia and step fascia pre finished both sides
